NOAM FAVIER

$ whoami

Software Engineer · Systems Architect · AI Tooling Specialist

Full-stack engineer specializing in local-first AI, real-time processing, and high-performance developer tools. Founder of NF Software. I architect systems from scratch—pipelines, agents, CLIs, TUIs, memory graphs, and OS-level tooling.

01 experience — git log -graph

* commit bdb2c60 (HEAD → main)
Date: 2023 - now

Founder & Lead Engineer @ NF Software · Paris, FR
Architected Iris, an on-device voice AI assistant (Go, wake word to STT to LLM to TTS). Built Iskra, a Git automation CLI succeeding Zvezda, and NF-ToolBox, a Go license server with Stripe billing on Postgres. Full ownership: systems design, AI pipelines, UI/UX, DevOps, product direction.

* commit eb6179f
Date: Jun 2026 - Jul 2026

42 Piscine @ 42 Paris · Paris, FR
Intensive 4-week C selection bootcamp: solo and pair-programming projects under strict time pressure and peer evaluation. Completed with strong results; admitted to the core program starting Nov 2026.

* commit 4472954
Date: Sept 2022 - 2025

Software Engineer @ Freelance · Remote
Delivered custom LLM pipelines, automation tools, and local-first AI solutions for clients. Integrated AI workflows into existing infrastructure.

02 projects — ls ~/code

Iris/ Local Voice AI Assistant · Go, Swift, Python
On-device pipeline (wake word → STT → LLM → TTS) in Go, powered by sherpa-onnx, running fully offline on Apple Silicon. No cloud dependency.

Iskra/ Git Automation CLI · Go
Single Go binary handling AI-generated commit messages, bulk multi-repo sync, and status overviews. Successor to Zvezda, rebuilt for speed and simplicity.

sketchybar/ macOS Status Bar · Lua, Shell, C
Tokyo Night-themed SketchyBar config (Lua, SbarLua) with multi-monitor AeroSpace workspace integration, live WiFi/battery/CPU/media widgets, and a custom icon font. Most-starred repo on GitHub.

Nvim-config/ Neovim IDE Configuration · Lua
Batteries-included Neovim setup: 28 language servers wired through native `vim.lsp.config` with no `nvim-lspconfig` boilerplate, blink.cmp completion, Treesitter, Harpoon, LazyGit, Trouble diagnostics, plus Jupyter and LaTeX support.

Mew/ POSIX `cat` Clone in C · C
Strict C11 reimplementation of `cat`: zero dependencies, full POSIX flag handling, ASAN/UBSAN-checked in debug builds. A deliberately small, correct systems tool.

03 academic — university

EnronBox/ AI Email Analysis Platform · Feb-Jul 2025
Full-stack NLP research project (Flask, React, Tauri) classifying, summarizing, and detecting emotion across the Enron email corpus using transformer models (BART, DistilBERT), with GPU acceleration and Ollama-generated responses.

Frisian Draught/ Team Lead · Sep-Dec 2024
Led a 5-developer team building a Java/JavaFX application with DQN and Minimax AI agents, state management, and a multiplayer engine. Implemented reinforcement learning strategies.

PotPotGolf/ Lead Developer · 2023-2024
Built 3D engine from scratch using Java/LWJGL/OpenGL with physics simulation, HDR lighting, shader pipeline, terrain rendering. Created ML agents for procedural courses with A* pathfinding validation. Won best project award.

04 skills — htop

Go	90%
Python	85%
Java	85%
C	75%
Lua	65%
JavaScript	60%
C++	55%
Rust	45%
Swift	40%

primary	Go, Python, Java, C
also	Lua, JavaScript, C++, Rust, Swift
tools	Docker, GitHub Actions, Neovim, Bubble Tea, sherpa-onnx, Ollama, OpenGL, Terraform, Tauri

`Local-First Architecture` `Real-Time Systems` `AI Agents` `DevOps Automation` `TUI/CLI Design` `Systems Programming`

05 education — cat ~/.edu

42 Paris
Software Engineering · Starting Nov 2026
Admitted after passing the Piscine

BSc Data Science & AI
Maastricht University · 2022-2025

Baccalauréat (Mention Bien)
Lycée Français
20/20 Math, 17/20 Physics

06 languages — locale -a

fr_FR **C2** French, native
en_GB **C2** English
es_ES **B1** Spanish
nl_NL **A2** Dutch

07 also — ls ~/certs

TOEFL 106/120 · Java, Python, Go (SoloLearn) · AI & DevOps specializations

Discipline (10+ years gymnastics) · Team leadership · Technical writing · Product ownership · Full-stack thinking · Creative problem solving · Bodybuilding for 5 years and physically fit

Local-first over cloud. Terminal workflows. Readable architecture beats clever code.
